Complete Remote Steam Boiler Control with the Smart Steam Control 289

Managing multiple steam boilers across multiple properties can be stressful and expensive, especially when something goes wrong. Stop losing precious time and money to unnecessary service calls and site visits.

The tekmar Smart Steam Control 289 can be retrofit to any brand of boiler, old or new, and features real time remote mirrored controls through the Nexa™ by Watts app, so you can skip the maintenance trip and make adjustments across multiple properties from your phone or desktop.
