

What if there were a way
to **proactively identify** and
address plumbing issues before
they could affect your guests?

Smarter Water Management
Better Building Performance

That's Nexa.

Real-Time
Alerts

Uncover Energy
Savings

More Efficient Labor
Usage

System Insight and
Optimization

Avoid Poor Guest Experiences

“There’s nothing better than the hotel shower.
And nothing worse than it being cold.”

Guests expect
clean water, a
hot, pressurized
shower, and a
leak-free
room

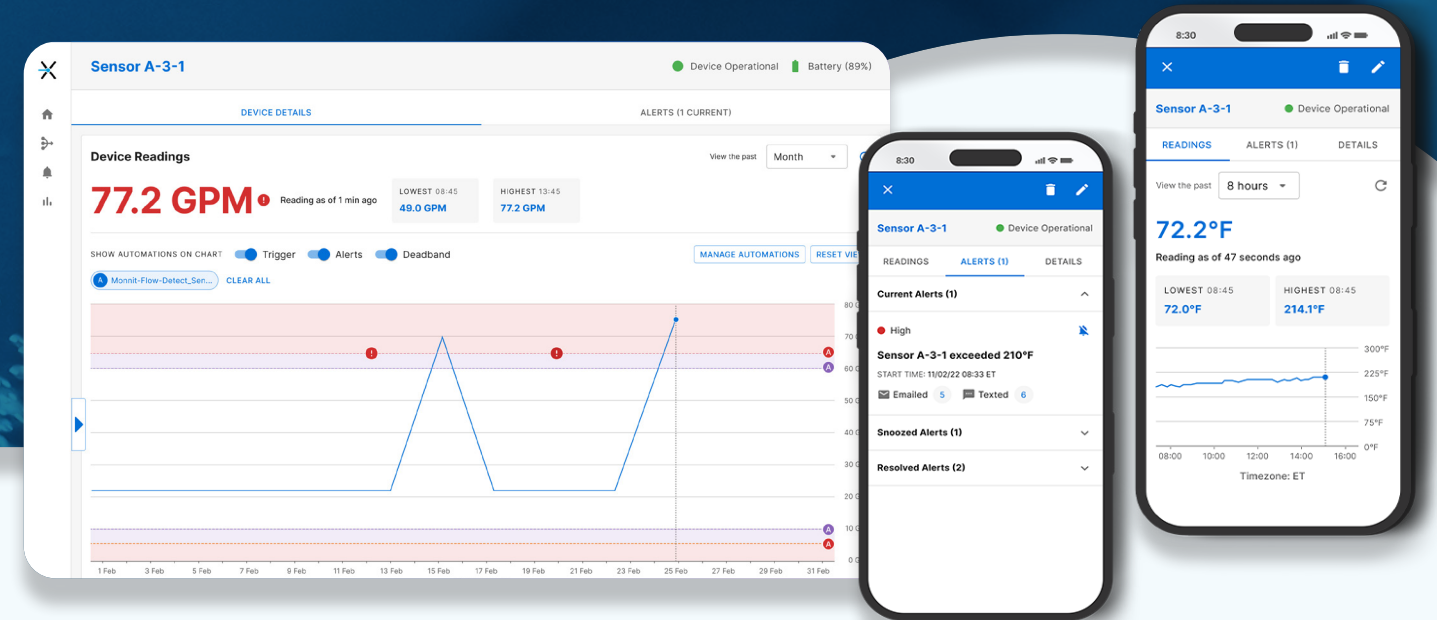

81%
of travelers
frequently or always
read reviews before
booking a hotel

The Key to a 5-Star Stay

Nexa is a system of connected equipment that works with companion software to identify, monitor, and mitigate water management issues. **Non-invasive sensors attach easily to your existing equipment, no matter the age, no matter the brand.** With the insight Nexa delivers via an intuitive dashboard, and the expert advice and support your Nexa Customer Success Manager provides, your engineering and management teams are empowered to address problems before the guests in your hotel can be affected.

How Nexa Works

Small Sensors, Big Insight. Huge Results

- 1 Non-invasive sensors install easily onto existing plumbing equipment
- 2 Data transmission begins immediately
- 3 Easily track, view, and analyze data in your Nexa dashboard
- 4 Gain insight with system map, data trends, and alerts

Guest Experience

- ✓ Consistent temp & pressure for comfort and safety
- ✓ Reduce negative reviews
- ✓ Increase guest retention

Energy Savings

- ✓ Identify inefficiencies
- ✓ Optimize system performance
- ✓ Reduce water and energy use

Cost Savings

- ✓ Decrease complaints & comped rooms
- ✓ Reduce downtime
- ✓ Increase labor savings

Nexa is your All-in-One Solution to Hotel Water Management

Q: Is Nexa compatible with the equipment installed in my building?

A: Yes. Nexa works with your existing system components across brands and models.

Q: What does the installation process look like?

A: Nexa installs easily onto your existing equipment and features an intuitive setup. The Nexa team will be available for support should you need it.

Q: What support will I receive after installing Nexa? Who do I contact for help?

A: Your Customer Success Manager will conduct regular check-ins that best fit your preference and availability. Your CSM is also available for support.

Q: Do Nexa sensors need access to my building's Internet?

A: Internet access is not required. Nexa provides the option to connect via a cellular gateway or an ethernet gateway, depending on your connectivity preference.

Q: How many users can I have with Nexa?

A: As the system admin, you'll be able to invite an unlimited number of users with your organization to engage with Nexa.

Q: Which Nexa sensors will I need?

A: The Nexa team will work with you to determine which sensors will work best with your building.
